

## The End of All Flesh

*"Unless Those Days were Shortened, No Flesh Would be Saved"; Mattit'yahu (Matthew) 24:21,22*

### What does Technology, the Corona Virus, and Prophecy all have in common?

Do you have frequent or continuous headaches? Chronic bloody nose? Constant fatigue, insomnia? Have troubles with infertility, giving birth, miscarriages? Hip troubles? Memory problems? Chest pains? Asthma? Feel like your eyes are bulging? Or that your lips, or throat are often swollen? Feel like you have flu like chills, but without having the flu? Anxiety? Constant ringing in your ears? Your mind sounds like roaring waves or like a freight train in the background? Experienced psychosis? Hear voices? Have unexplainable skin rashes?

Do you have any two or more of these symptoms persistently? Do ANY of these symptoms alleviate to ANY degree when you are away from the office? Outside of your house? Outside of your newer car? Outside your motel room, or outside of the city and in the country away from technology?

The earth is soon to wobble like a drunkard and teeter like a hut tossed in the wind; **Yesh'yahu (Isaiah) 24:18-20**. And weapons of warfare reduced to spears and swords; **Yechezk'el (Ezekiel) 29:6-10**. And the inhabitants of the earth, both rich and poor alike, made equally desolate, and the earth burned with fire and few men left; **Yesh'yahu (Isaiah) 24:1-6**.

And in light of these events to soon take place in our lifetime, Yeshua states that "unless those days were shortened, no flesh would be saved."; **Mattit'yahu (Matthew) 24:21,22**.

But what in the world do any of these prophetic events have in common with the symptoms described in the opening paragraph above? And what could possibly take place that would bring all flesh to the brink of extinction?

Nuclear warfare? Nuclear explosions only destroy life in the immediated vicinity of the explosion, and so this would be an unlikely cause in destroying "all" flesh. In addition, many species can survive the effects of radiation long enough to reproduce - an event hardly resulting in the extinction of all flesh.

How about volcanic activity? After the flood the earth had tremendous volcanic activity throughout it, but most all lifeforms survived this and have thrived just fine ever since. The NW alone sits on a single giant lava bed produced at one time by a multitude of active volcanos existing long ago along the Cascade mountain range, but yet it has thrived with wildlife.

Earthquakes? No. These are also region specific. An asteroid? Asteroids have struck the earth many times in the past, some believing asteroids to be the cause of the extinction of the dinosaurs. But again, most life on earth has continued on and flourished in abundance, despite these well known and documented asteroid strikes. Even the flood waters that covered the entirety of the earth at one time did not bring an end to "all" flesh.

So what could possibly cause all flesh on earth to come to the brink of extinction? And how will those days be "cut short"?

There is only one thing on earth today that effects every living organism on earth - from plants to animals,

insects, birds, sea life, and humans alike, and that thing is: human generated radiation in the form of electromagnetic waves (electricity), radio waves (LF/VLF), television signals (VHF/UHF), radar, and various microwave technologies including cell phone, wifi, and satellite technologies - *and now 5G, the most dangerous and penetrating of them all.*

It all began in the 1800's with the introduction of the telegraph, along with the sudden appearance of many new types of sicknesses rarely ever acquired by anybody before, but now experienced extensively by those who operated the telegraph service and who lived close to telegraph lines. Those new sicknesses rarely before ever heard of were that of the flu, heart disease, diabetes, and cancer. Other effects frequently experienced by these telegraph operators were headaches and insomnia among other things.

The flu prior to this was scientifically known to be associated directly with increased electro-magnetic activity on the sun, thus the name "influenza" because of the clear "influence" the sun had on flu epidemics. But once electromagnetic activity was introduced artificially into our environment through the introduction of electricity, our metabolism was slowed down making it ever more difficult to efficiently digest fats, proteins, and sugars. Which in turn caused large portions of the population to begin experiencing heart disease, cancer, and diabetes; and that caused the flu to become an annual event instead of the traditional 11 year event associated with the magnetic storms on the sun.

The introduction of radar, radio waves, television waves, and satellite technologies only caused these diseases to permeate society ever more deeply with the introduction of every new phase of these "radiation" based technologies. Then with the mass introduction of wireless technologies in the late 1990's, these health issues along with the symptoms described in paragraph one of this article, increased exponentially - even effecting the animal kingdom.

Among some of the well documented effects of these technologies on the animal kingdom are the mass loss of bee colonies near cell towers, and the extinction of many insects and loss of ability of birds around these technologies to successfully navigate for migration. The many types of trees prematurely aging and dying, cedar trees in particular, are also tied to the introduction of this technology into our environment, as well as to the tens of thousands of fish dying in the oceans from sonar. And now we are in the next phase: 5G. *(For some amazing documentation and references to hundreds of scientific studies and references in support of these facts, I highly recommend reading the book by Arthur Firstenberg, entitled, "The Invisible Rainbow").*

So why is this significant? And why should we be concerned about the effects of this technology more so than any other technology ever created by mankind?

It is because 5G has arrived, and with it the "Corona virus", and an irreversible disruption of the earth's electrical cycle in the ionosphere necessary to the existence of all life on earth. It is the technology that is being introduced this year that will be so disruptive to the electrical balance of the life cycles of every living thing on earth, that "if those days were not shortened no flesh would be saved".

Let me explain, the earth is an electrical circuit that regulates all life on the earth. We as individuals are also electrically driven, as are all living things on earth. A key component of this electrical circuit of the earth is the ionosphere. Without the ionosphere, no life on earth could exist. The electrical nature of all life on earth is absolutely dependent on this layer of the atmosphere for long term survival.

Likewise, without proper function of the ionosphere, the rain cycles would be severely hindered, and/or altered, and ionization of the air and of the soil, to keep the soil rich in nitrogen and fertile, would be severely disrupted.

But as of this year 2020, to establish 5G technology throughout the earth, fleets composed of anywhere from 500 to 42,000 satellites each, are being launched into the ionosphere in order to saturate the earth with a blanket of UNNATURALLY pulsed microwave radiation to deliver internet and wifi service to every location on earth.

I used to believe that these days would be shortened by Yeshua's return just before we annihilated ourselves via nuclear warfare. But since then I have come to realize that armies coming against Jerusalem to battle Yeshua at His return with swords and spears composed of enough wood to fuel Israel's energy needs for 7 years; **Yechezk'el (Ezekiel) 39:9**, is not a world any longer capable of nuclear self annihilation. This is a world whose electrical capacity, and therefore, nuclear capacities, have been neutralized or destroyed.

And this is how I propose this will happen. Communications companies who are committed to completing the G-5 circuitry of the earth through their launch of the tens of thousands of satellites with their combined 60 million watts of artificially produced and unnaturally pulsed radiation, will effect the ionosphere in a way that will cause irreparable damage to it. I believe it is this very disruption in the ionosphere that will cause the earth to begin wobbling uncontrollably like a drunkard; **Yesh'yahu (Isaiah) 24:19,20**; and that will ultimately cause all the green grass and 1/3 of the trees to be burned up; **Revelation 8:6,7** creating famines; **Mattit'yahu (Matthew) 24:7**, and marking the first Trumpet as "the beginning of sorrows", and that will likewise cause people to be scorched by the sun by the time of the 4th bowl; **Yesh'yahu (Isaiah) 30:26**; **Revelation 16:8,9**.

In effect, this 5G technology, and the accompanying sudden injection of tens of thousands of satellites into the ionosphere to begin suddenly pulsing out 60 million watts of artificially created radiation down to the earth to create worldwide internet coverage is the most destructive plan ever devised by man. And it is going to cost the inhabitants of the earth dearly because "they have forsaken the everlasting covenant, and violated the Torah...", and "therefore the earth will be burned with fire and few men left; **Yesh'yahu (Isaiah) 24:5,6**.

This unnatural, pulsed radiation upon disrupting the ionosphere's electrical balance with the earth will effect every living thing on earth from viruses to humans and everything in between. The resulting death will be spread out over the next 7 years or so. And this death will be from none other than the earth "protecting" itself.

God created all things with self defense mechanisms built into them, this includes the earth. So for ~1260 days the earth is going to violently react to this "infection" artificially injected into its ionosphere by going into its drunken wobble which will cause massive natural disasters, earthquakes, volcano's, and a great whirlwind; **Yerem'yahu (Jeremiah) 25:31-33**, to be created, as well as make us vulnerable to asteroid strikes and solar heat; **Revelation 8:10,11**; **16:8,9**. Sometime shortly after this, and before the electrical grid and technology is destroyed, the False Messiah will arise and impose his "mark". Then sometime after this, the electrical grids of the earth will be destroyed, and the satellites cast out of the sky; **Revelation 6:13** sometime shortly before Yeshua's return. The destruction of the electrical grid and satellites is what

in turn causes those days to be "cut short" to prevent the destruction of all flesh.

However, in the resulting chaos, nations in the best position to engage in traditional, non-technology based, sword, spear, and horseman type warfare will go for a power grab sometime after the False Messiah arises, and the mark of the beast imposed. China, whose symbol is the "dragon", will likely be that nation, and the one that leads the charge across the Euphrates River to kill off 1/3 of the remaining inhabitants of the earth.

But understand that the effects of this invasion of the "ionosphere" will not necessarily "start" suddenly, but rather, that shortly, beginning with the fires we are seeing now in the NW, we should see the symptoms of this damage "*begin*" to take effect in the earth. And when taking into consideration the Covid-19 pandemic, I believe we have already been seeing "the beginning" of those effects prior to these fires.

Likewise, even as the flu is not "caused" by the "flu virus" and as such has no cure (flu shots are a major deception), even so, Covid-19 is not "caused" by the Corona virus (Corona is language describing "the sun", like "influenza" is related to the sun - some things never change) and therefore cannot be cured with any vaccine. As such, any vaccine they come up with will also be a deception, and very deadly to anybody who takes it who is of the "wrong" political position or world view.

Additionally, you may wonder why sometimes this virus is called "Corona Virus" and why at other times it is called "Covid 19"?

It is because one is the name of the actual virus associated with it (Corona), and the other is the "code" name under which the attempted overthrow of America is taking place (Covid-19). Covid-19 stands for "Cover Id, 2019". In other words, the diversion of the Corona virus that would be initiated onto the world scene in 2019 as the "cover" to detract from the real purpose for the virus - to overthrow America and subdue the nations in order to somewhat "instantly" establish the New World Order throughout the earth. This event is also sometimes referred to as the "great reset".
